AMSTERDAM - 1968

CONTENTS

Opening Address	v
Auxin transport: general remarks concerning the terminology and the methods H.Kaldewey	1
A view of polar auxin transport A.C.Leopold, R.K. dela Fuente	24
The movement of IAA- ¹⁴ C in the hypocotyl of <i>Phaseolus vulgaris</i> C.W.Smith, W.P.Jacobs	48
The distribution of indolyl acetic acid in <i>Coleus</i> stems E.Wangermann	65
Senescence in excised petiole segments: the relevance to auxin and kinin transport D.J.Osborne, R.F.Horton, M.K.Black	78
A theoretical model for polar auxin transport D.J.Osborne	97
The acropetal movement of auxin through segments excised from petioles of <i>Phaseolus vulgaris</i> L. C.C.McCready	108
Is auxin actively transported acropetally? G.W.Keitt Jr.	130
Synthesis and destruction of hormones in relation to auxin transport M.Bastin	135
Agents modifying the longitudinal transport of auxin Y.Vardar	156
The effect of growth substances on transport in plants J.Moorby	192

Macromolecule and hormone interactions in transport M.Bara	207
The lateral movement of auxin in phototropism R.K. dela Fuente, A.C.Leopold	220
The transport of plant hormone in tropisms N.Arslan	232
Auxin in root geotropism H.Konings	237
Plagiotropism and auxin transport C.J.Lyon	251
Hormone translocation and rooting C.J.Gorter	293
The control of apical dominance in the Alaska Pea T.K.Scott, J.B.Pritchard	309
Auxin relationships in symbiosis F.H.Meyer	320
Diffusible plant hormones in cabbage A.Skytt Andersen	331
The role of growth regulators in determining the penetration of 2,4-D into the primary leaves of <i>Phaseolus vulgaris</i> J.A.Sargent	345
The penetration of growth regulators into leaves J.A.Sargent	365
The diffusible gibberellins from the stem apex and germinating lateral buds of sugarcane B.H.Most, A.J.Vlitos	380
The role of auxin in the flowering process G.Alleweldt	393
The role of auxin in the dormancy of buds of woody plants G.Alleweldt	425
Concluding remarks A.C.Leopold	450
